

ABSTRACT OF THE DISCLOSURE

This invention relates to compounds which are generally alpha-1A/B
5 adrenoceptor antagonists and which are represented by Formula I:

I

wherein Z is -C(O)- or -S(O)₂-, X is carbon or nitrogen, Y is carbon, and X-Y
considered together are two adjoining atoms of the ring A, said ring being a fused
aromatic ring of five to six atoms per ring optionally incorporating one to two
10 heteroatoms per ring, chosen from N, O, or S; and the other substituents are as defined
in the specification; or individual isomers, racemic or non-racemic mixtures of isomers,
or pharmaceutically acceptable salts or solvates thereof. The invention further relates
to pharmaceutical compositions containing such compounds, methods for their use as
therapeutic agents, and methods of preparation thereof.
